Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In order for more than one species to be examined, the appropriate additional examination fees must be paid. The species and corresponding claims are as follows:

<u>Species</u>	<u>Figure(s)</u>

The following claim(s) are generic: no claim appear generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The limitation of:

A magnetic bearing device, comprising:

a rotor (14):

a plurality of electromagnets (N1, N2) for controlling a radial position and/or an axial position of the rotor;

a power source for supplying power (E, figure 2) to the electromagnets;

a common node (64b) commonly connected to each one end of the electromagnets:

switch means (T2, T3) for switching a voltage of the common node;

cannot be a Special Technical Feature as these features are shown in

Veillette et al., US 3937533. Note labeled figure 2.

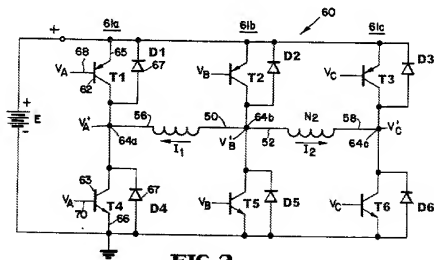

FIG. 2
